**Excerpt from a suspense novel**

Shia looked up from his monitor, rubbed his eyes, and stared down the dark hallway toward the CFO's office. He was certain a sound had come from behind the closed door. It was a heavy thump, like someone had dropped a bowling ball.

*There shouldn't be anyone else here at this hour,* Shia thought to himself as he looked at his watch. The only illumination came from Shia's computer monitor. His office was on the thirtieth floor, far too high to get much more than a faint glow from the street lights below. Shia slowly stood up before reaching down to turn off the computer screen, hoping to hide in the darkness. He considered turning on his phone's flashlight, but his thoughts were cut short by a loud crash followed by the unmistakable tinkling of shattered glass.

Shia froze, as if he were caught by the gaze of Medusa. The initial doubt that he would actually find someone snooping around the CFO's office had turned to an icy fear that gripped his lungs and would not let him breathe. His heart was pounding loudly in his ears; he knew whoever was

**Stimulus: 1 of 6**

**Which of the following correctly describes the sequence of events as they appear in the passage?**

- Shia first heard a thump, then he heard a loud crash followed by shattering glass, and finally he turned off his computer screen.
- Shia first turned off his monitor, then he hesitated to use his phone's flashlight, and finally he decided to flee to the emergency stairwell.
- Shia first heard a loud howl that he was sure couldn't be human, then he turned off his monitor, and finally he sprinted for the emergency stairwell.
- Shia first stood up, then he heard a loud howl that shocked him into motion, and finally he heard a thump from the CFO's office.

FLAG

In 1932, the Australian government lost a war against the native emu population. The operation that has since become known as the Great Emu War began as an initiative to combat overpopulation of the crop-destroying birds invading farmland around Chandler and Walgoolan. The initial assault on the flightless avians began on November 2 and lasted six days before the military personnel withdrew. Efforts resumed on November 12, but by early December, the feathered foes had adopted guerrilla tactics against the targeted wheat fields, rendering military involvement largely ineffective. The Australian government declined further involvement with the ongoing conflict in 1934, 1943, and 1948, despite the repeated pleas for assistance by the farmers in the area.

**Stimulus: 1 of 2**

**Based on the passage, which of the following statements accurately predicts the consequences of the failed initial assault on the emus?**

- The emus would likely continue to increase in population and damage more farmland.
- The government would increase financial support for the farmers to compensate for the crop damage.
- Emus would be recognized as protected species immediately following the war.
- Military equipment would be advanced in anticipation of another similar operation.

After arriving late for work, Josh proceeded to the break room, helped himself to a couple of donuts, and grabbed the coffee pot. It was disappointingly empty, so, pressed for time, he raced to put coffee in the filter and fill the reservoir, watching in dismay as water cascaded out onto the floor. Recognizing his complete inability to operate the machine, he asked a colleague to help while he cleaned up. Finally reaching his office, he put the coffee down too close to the edge of his desk as he rapidly scanned his calendar, causing the entire cup to spill into a drawer of important files. Frustrated, he cleaned up and returned to the breakroom, where the coffeepot was again empty. Tomorrow, he would arrive on time!

**Stimulus: 1 of 3**

**Which of the following is the topic of the passage?**

- Typical issues with clumsiness at work
- Josh's troubles with colleagues emptying the coffee pot
- Josh's difficulty when moving fast to compensate for tardiness
- Typical issues with making coffee at work

**Cats vs. Dogs**

There are many different choices when looking for a pet. Despite all the different possibilities, people will often choose either a cat or a dog. There really isn't any question, though. Except in one particular circumstance, one should always choose the cat.

First, cats are cleaner than dogs. Cats are constantly cleaning themselves. I am pretty sure the only time they lick anything is to clean it. If a cat starts licking you, it's because you are dirty and it wishes you were clean. Dogs lick everything, including your face and mouth. When a dog licks your mouth, it is like you have kissed anything the dog licked, including the bottom of your shoes and probably the toilet.

Second, cats are way more considerate than dogs. Dogs will drool on your freshly laundered linens all the time just because they want to, but cats try to make your clothes and furniture warmer by adding their fur. Cats use a litter box in order to contain their waste to a particular area, while dogs will use your shoes or favorite rug so that you know they

**Stimulus: 1 of 6**

**Which of the following statements can be inferred as the author's purpose for writing the passage?**

- To inform about the challenges pet owners face when choosing between cats and dogs
- To provide a balanced view on the advantages and disadvantages of owning various types of pets
- To compare and contrast the typical behaviors of cats and dogs without bias
- To argue cats are generally a superior choice for a pet compared to dogs

The largest chameleon species in the world, the Parson's Chameleon (*Calumma parsonii*) reaches up to 68 cm (27 in) in total length. The Parson's Chameleon is native to the eastern side of Madagascar, and they can be found in the forest canopies. The chameleon has one of the longest lifespans among chameleons, at 10 years.

This species is sexually dimorphic, with males growing larger than the females. Males are also brighter in color than females. Depending on the subspecies, males can be green, turquoise, or yellow. Females of both subspecies have a more muted color, generally a brown, green, or yellow. Females lay one clutch per year of up to 60 eggs, which incubate for 1 to 2 years.

**Stimulus: 1 of 3**

**Which of the following sentences summarizes the passage's content?**

- Male Parson's chameleons are more colorful than females, sometimes even showing bright turquoise hues.
- Parson's chameleons have unique characteristics that set them apart from other species of chameleon.
- Parson's chameleons have one of the longest lifespans among chameleons and are by far the largest.
- Female Parson's chameleons lay only one clutch of 60 eggs per year, which incubate for up to 2 years.

The largest chameleon species in the world, the Parson's Chameleon (*Calumma parsonii*) reaches up to 68 cm (27 in) in total length. The Parson's Chameleon is native to the eastern side of Madagascar, and they can be found in the forest canopies. The chameleon has one of the longest lifespans among chameleons, at 10 years.

This species is sexually dimorphic, with males growing larger than the females. Males are also brighter in color than females. Depending on the subspecies, males can be green, turquoise, or yellow. Females of both subspecies have a more muted color, generally a brown, green, or yellow. Females lay one clutch per year of up to 60 eggs, which incubate for 1 to 2 years.

**Stimulus: 3 of 3**

**Based on the content of the passage, which of the following sentences offers a logical inference about the Parson's chameleon?**

- When Parson's chameleon eggs incubate the full 2 years, there is a greater chance for female hatchlings to survive.
- A turquoise Parson's chameleon would most likely be male.
- There are no known cases of Parson's chameleons living longer than 10 years.
- The unique coloring of the Parson's chameleon contributes to its longevity.

FLAG

On February 2 of each year, the United States observes the unusual holiday of Groundhog Day, a day of hope that winter is over and spring is beginning. This tradition has been officially observed in the U.S. since the 1800s, and is believed to have developed from European folk traditions in which a bear, fox, badger, or even hedgehog would serve as the symbolic meteorologist. Although other cultures and towns observe Groundhog Day (or something similar), the town of Punxsutawney, Pennsylvania takes special pride in being home to the one true forecasting groundhog, Punxsutawney Phil. At the turn of the twentieth century, townspeople formed the Punxsutawney Groundhog Club to perpetuate the joyful rituals and events surrounding Groundhog Day. Over the years, these events have come to include a scavenger hunt, a talent show, and a ball.

Legend has it that on Groundhog Day the official weather forecasting groundhog awakens from hibernation and comes out of his burrow to look for his shadow. If he sees his shadow, six more weeks of winter are to come, and Punxsutawney Phil goes back to bed. However, if he does not see his shadow, Punxsutawney Phil takes this as a sign that spring has arrived, and he remains above ground. Of course, common sense tells us that February 2 is too early for spring to begin, and that while animals may be attuned to various elements of nature from which humans might learn, they are unlikely to act on their instincts based on a schedule set by a Gregorian calendar. Nevertheless, a visit to Pennsylvania to see Punxsutawney Phil and all of the fun he inspires each year might just provide the touch of hope needed to reach the end of winter.

**Stimulus: 1 of 3**

**Which of the following pairs of search terms entered into a search engine with the phrase "Groundhog Day" is likely to produce information about the origin of Groundhog Day?**

- (●) History and folklore
- ( ) Holiday and festivities

**Which arrangement of the following five sentences yields the most logically organized paragraph? (Move the options into the box on the right, placing them in the selected order. Use all the options.)**

Candy making is easier than it looks, but it does require some specialized equipment — at least if you want to do a consistent job.

As with just about anything kitchen-related, it is possible to spend money almost indefinitely on candy-making supplies, but the real essentials consist of a few not-too-expensive items.

At the top of the list is a special thermometer known, appropriately enough, as a candy thermometer.

Though not used exclusively for candy making, such thermometers have specialized gradations that show when the sugar has been boiled to specific stages.

The names of these stages, such as "thread" and "hard ball," refer to the results of old-fashioned qualitative tests performed in the days before home kitchens had access to such tools.

**Time Remaining:** 00:31:55

FLAG

**Read this paragraph and answer the question.**

**The idea that a vampire's fingernails or hair continue to grow after death can be explained by the drying out of the body, which creates the illusion of growth. Much of what we consider vampire folklore originated from attempts to make sense of phenomena that were inexplicable at the time. Common symptoms of tuberculosis, such as pallor and constant fatigue, have been offered as examples of conditions once mistaken for vampirism. Folklore was a way for people in the past to explain mystifying events; today, science answers those inexplicable questions.**

**Which of the following should be the topic sentence of the paragraph?**

- Common symptoms of tuberculosis, such as pallor and constant fatigue, have been offered as examples of conditions once mistaken for vampirism.
- The idea that a vampire's fingernails or hair continue to grow after death can be explained by the drying out of the body, which creates the illusion of growth.
- Much of what we consider vampire folklore originated from attempts to make sense of phenomena that were inexplicable at the time.
- Folklore was a way for people in the past to explain mystifying events; today, science answers those inexplicable questions.

FLAG
The 1960s musical style known as baroque pop reintroduced classical — and as the name implies — baroque instrumentation to Western popular music; the genre's breakthrough moment is often ascribed to The Beatle's 1965 single, "In My Life," which uses a sped-up piano sample to achieve a "harpsichord" sound. Despite a few hits, the baroque pop phenomenon was short-lived, vanishing virtually overnight with the rise of soul music in the early 1970s. Because of this, it has been rediscovered by 21st-century audiences and is now considered an iconic part of the "sound of the '60s."
Stimulus: 1 of 1
Which of the following words or phrases, if substituted for the underlined portion, would improve the coherence of the paragraph? (Select all that apply.)
Nonetheless.
Small wonder that
In spite of this.
Altogether.
In conclusion.
